Public Safety or Construction — Stay Tough with Panasonic TOUGHBOOKS

WE KNOW WHAT WORKS!

With 20+ years experience in computers and networking, Tallgrass Systems Ltd (TSL) is one of the most knowledgeable providers of network products and managed services in SouthLand. TSL specializes in SMB networks, ranging from 10 to 1000 users in virtually all business categories. We provide expertise, we consult, we fix, we assist, and we provide virtually any product or service at very competitive rates. We can help your business growth through technologies such as wireless, VOIP telephony, server management, document management and security. TSL will save you time and expense with our proven network solutions! Call us today at 800-475-3434 to discuss your business technology needs. (Specs & Prices subject to change without notice.)

Rugged, Lightweight, Wireless and Convertible

Designed to withstand the rigors of your industry, Panasonic fully rugged Toughbooks are put through stringent environmental tests to simulate the harshest challenges your mobile PC will face.

TOUGHBOOK 30

- Genuine Windows® XP Professional
- Intel® Centrino™ Duo Mobile Technology
- Integrated 802.11 a/b/g wireless LAN
- 13.3" daylight-readable TFT Active Matrix Color LCD with touchscreen
- 8.2 lbs., including battery, floppy drive and handle
- Full magnesium alloy case with handle

Business-rugged

Starting at 3.1 lbs., these slimline laptops have a super resilient magnesium alloy case, Wide Area Wireless-ready design and up to 9+ hours of battery life. They're engineered to handle the drops and bumps of daily life.

TOUGHBOOK I9

- 10.4" daylight-readable color LCD swivels
- Wireless WAN, wireless LAN, Bluetooth™ and GPS Pressure-sensitive touchscreen
- (Available with pen-only digitizer screen)
- 5 lbs., lightweight design
- Full magnesium alloy case with handle
- Moisture and dust resistant LCD, keyboard and touchpad
- Shock-mounted removable hard drive in stainless steel case
- Sealed port and connector covers

For the On the Road Executive ... the TOUGHBOOK 74

Bumps & Grins — The Toughbook 74 has toughened black edges all the way around the magnesium alloy case, covered ports, a drip-proof keyboard, and a built-in handle. While it's only "semi-rugged," that basically means that while it's not fit for duty in Iraq, it's plenty hard enough for the rigors of the road. The fingerprint reader is optional.

Business Solutions & Services

MANAGED SERVICES - WE KNOW WHAT WORKS!

TSL offers professional technical services to SMB through our T-CARE program of on-demand, on-site SLA, and network managed services. There is a service package to fit any size SMB business. For surprisingly low price per month, TSL can remotely monitor your network, alert you of any issues that require action, and schedule an on-site visit if needed to resolve those issues. T-CARE MS is a proactive solution which keeps your network and desktops healthy and working. T-CARE NS provides on-site network support, configuration, and installation services as needed on an annual basis. T-CARE OD provides break and fix services for those businesses that require incident-specific support services. Call us at 800/475-3434 or email us at support@gotnx.com for a free T-CARE consultation on the best technical service plan for your business.

DOCUMENT MANAGEMENT

More and more businesses are storing important documents on their network for quick retrieval as well as archiving. This goes beyond word processing and forms. It is about workflow and office efficiency. Regardless of your business type, you can save man-hours by creating, scanning and storing your documents on the network rather than in a file cabinet. The time for the "paperless" office is NOW! The payback on many systems is less than a year. TSL can evaluate your needs and recommend a document imaging system for your business. Basic to all solutions is a **high-speed scanner and a database-related software** to index and find those documents. The TSL tech staff is CDIA trained and we can integrate this solution into your office. *TSL is an authorized reseller for Fujitsu Scanners, Xerox, HP and Abby document solutions.* Call us today at 800-475-3434 or email us at sales@tslnet.com.

VOIP TELEPHONY

Ready to replace your old multi-line office phone system? Go digital with VOIP and get voice mails as emails; click and call out of Microsoft Outlook! Check your voice mails with a browser from anywhere in the world. Reduce cable clutter with POE. The **3Com® NBX® V3000 PoE Bundle** represents a unique value—an IP telephony and Power over Ethernet switch solution priced and feature-optimized for the small-to-medium business market. The solution cost-effectively provides the benefits of converged networking, including increased productivity and improved customer interactions. 3COM NBX provides the lowest cost per port for a full-featured VOIP solution than any other manufacturer. *TSL is an authorized 3COM Voice/Data Partner.* Call us today at 800-475-3434 or email us at sales@tslnet.com.

SECURE WIRELESS SYSTEMS

Cisco Aironet® 1300 Series: Create **Hot Spots** in Restaurants, Office Lounges, and Schools. The Cisco Aironet 1300 Series supplies high speed and cost effective wireless connectivity between multiple fixed or mobile networks and clients. Typical applications for the Aironet 1300 Series are: 802.11a/g Network connections within a campus area, Outdoor infrastructure for mobile networks and users, Public access for outdoor areas, and temporary networks for portable operations. *For a quote call TSL, the Cisco reseller for Cisco solutions. TSL installs configures and manages your network.* Call us today at 800-475-3434 or email us at sales@tslnet.com.
